

Contents

NOTICE AND DISCLAIMER CONCERNING LIABILITY, iv

MODULE 1: INTRODUCTION TO HVAC AND PLUMBER TECHNICAL TRAINING, 1

Welcome, 1

LESSON 1: COURSE OVERVIEW AND OBJECTIVES, 3

Safety Mission, 3
Who Should Take This Course?, 4
Course Purpose and Objectives, 5
Course Format, 6
Course Resources and References: Codes, 7
Course Handbooks, 8
Interrelationships, 9

MODULE 2: PROPANE BASICS, 11

Introduction, 11

LESSON 1: SOURCES AND CHARACTERISTICS OF LP GAS, 13

Introduction, 13
Sources of Liquefied Petroleum Gas, 14
Types of LP-Gas, 15
Important Characteristics of LP-Gas, 16

LESSON 2: PHYSICAL PROPERTIES OF PROPANE, 17

Introduction, 17
Specific Gravity, 18
Specific Gravity of Liquids, 19
Specific Gravity of Vapors, 20
Learning Activity: Specific Gravity of Liquid, 21
Learning Activity: Specific Gravity of Vapor, 22
Check for Understanding, 23

LESSON 3: EFFECTS OF PRESSURE AND TEMPERATURE ON PROPANE, 25

Introduction, 25
Pressure and Temperature Effects on Propane, 26
The Effect of Heat on Liquids, 27
The Effect of Adding Heat to the Liquid, 28
Liquids and Boiling Points, 29
Effect of Heat on Liquids in a Sealed Container, 30

The Effect of Relieving Pressure in a Sealed Container, 31
Boiling Point of Propane, 32
Temperature and Pressure Balance, 33
Propane Boiling Action: Valve Opened, 34
Propane Boiling Action: Valve Closed, 35
Effects of Pressure and Temperature:
Product Expansion, 36
Effects of Pressure and Temperature:
Additional Information, 37

LESSON 4: PROPANE SAFETY INFORMATION, 39

Introduction, 39
Gas and Odor Reports, 40
Fielding Gas Odor Reports, 41
Factors Related To Gas Leaks, 41
Gas Service Interruptions and Related Factors, 42
Service Interruptions: Policies,
Procedures, and Regulations, 43

LESSON 5: CUSTOMER SAFETY, 45

Introduction, 45
Propane Safety Brochures, 46
Learning Activity: Important Propane
Safety Information, 47
Decals, 50
Shutting Off Propane Flow: Demonstration, 51
Emergency Numbers, 53
Importance of Good Documentation, 54
Check for Understanding, 55
Learning Activity: Documentation Case Study, 56
Summary, 58

MODULE 2 QUIZ, 59

MODULE 3: DESIGNING AND INSTALLING VAPOR DISTRIBUTION SYSTEMS: EXTERIOR GAS PIPING AND CONTAINERS, 63

Introduction, 63

LESSON 1: DETERMINING EFFECTIVE SYSTEM LOAD, 65

Introduction, 65
Total Gas Demand, 66
Customer Gas Appliance Use Profile, 67

Determining Total Gas Demand, 68
Check for Understanding, 69
Effective System Load, 70
Determining Effective System Load, 71
Learning Activity: Calculate Effective System Load, 72
Total Gas Demand vs. Effective System Load, 73

LESSON 2: FACTORS AFFECTING SELECTION OF A PROPERLY SIZED CONTAINER, 75

Introduction, 75
Overview of Factors Affecting Container Sizing, 76
Vaporization and Container Sizing, 77
Vaporization Rate Factors: Wetted Surface Area, 78
Vaporization Rate Factors: Temperature, 79
Vaporization Rate Factors: Humidity, 80
Vaporization Charts and Tables, 81
Reading Vaporization Charts, 82
Container Installation: Aboveground vs. Underground, 83
Customer and Marketer Considerations, 84
Other Considerations, 85
Check for Understanding, 86

LESSON 3: SELECTING AND SIZING PIPE AND TUBING, 87

Introduction, 87
Overview of Pipe and Tubing Materials, 88
Steel and Wrought Iron Pipes: Characteristics and Connection Mechanisms, 89
Steel and Wrought Iron Pipes: Categories and Installation Considerations, 90
Copper Tubing: Characteristics and Connection Mechanisms, 91
Copper Tubing: Categories, 92
Copper Tubing Installation Considerations, 93
PE Pipe and Tubing: Characteristics and Connection Mechanisms, 94
PE Pipe and Tubing: Categories and Installation Considerations, 95
CSST: Characteristics and Connection Mechanisms, 96
Sizing Pipe and Tubing Between First- and Second-Stage Regulators, 97
Sizing Pipe and Tubing for Multiple Second-Stage Regulators, 99
Learning Activity: Select the Appropriate Piping and Tubing Size, 100

LESSON 4: INSTALLING VAPOR DELIVERY LINES, 101

Introduction, 101
NFPA 58 Requirements for Piping Installation, 102

Aboveground Lines, 103
NFPA 58 Requirements for Aboveground Lines, 104
Installing Underground Lines, 105
Step 1. Dig a Trench, 106
Steps 2 and 3. Insert Pipe or Tubing in the Trench and Plug or Cap Lines, 107
Testing Outside Lines, 108
Step 4. Testing Outside Piping Systems, Step-by-Step, 109
Step 5. Backfill the Trench, 111
Check for Understanding, 112

LESSON 5: INSTALLING VAPOR DELIVERY LINES: PE PIPE AND TUBING, 113

Introduction, 113
PE Pipe and Tubing, 114
Joining PE Pipe and Tubing, 115
Mechanical Fittings, 116
Special Tools, 118
Laying PE Pipe, 119
Installing Tracer Wire, 120
Attaching the PE Piping, 121
Attaching the PE Piping to the Mechanical Fittings, 122
Check for Understanding, 123

LESSON 6: INSTALLING VAPOR DELIVERY LINES: COPPER, 125

Introduction, 125
Copper Tubing, 126
Laying Copper Tubing, 127
Joining Copper Tubing, 128
Flared Tube Connectors, 129
Step-by-Step: Creating a Flare Connection, 130
Learning Activity: Identify Good Flare Connections, 132

LESSON 7: INSTALLING VAPOR DELIVERY LINES: METAL AND CSST, 133

Introduction, 133
Steel and Wrought Iron Pipe, 134
Steel Pipe Fittings, 135
Types of Steel Pipe Fittings, 136
Cutting and Threading Tools, 138
Measuring Steel Pipe, 139
Step-by-Step: Cutting Steel Pipe, 140
Step-by-Step: Threading Steel Pipe, 141
Step-by-Step: Assembling Threaded Pipe Connections, 142
Laying Steel Piping, 143

Check for Understanding, 144
 Corrugated Stainless Steel Tubing, 145
 Installing CSST: Precautions, 146
 Module Summary, 148

MODULE 3 QUIZ, 149

MODULE 4: DESIGNING VAPOR DISTRIBUTION SYSTEMS: REGULATORS AND METERS, 153

Introduction, 153

LESSON 1: REGULATOR SIZING AND SELECTION, 155

Introduction, 155
 Purpose of Regulators, 156
 Regulator Components, 157
 Learning Activity: Identify Regulator Components, 159
 Types of Regulators, 160
 Single-Stage Regulators, 161
 First- and Second-Stage Regulators, 162
 High-Pressure Regulators, 163
 Integral 2-Stage Regulators, 164
 Regulators for 2-psi Systems, 165
 Learning Activity: Identify Types of Regulators, 166
 Regulator Operations, 167
 Satisfying Gas Demand, 168
 Adjusting Outlet Pressure, 170
 Relieving Excess Pressure, 171
 Regulator Vent, 172
 Causes of Regulator Freeze-up, 173
 Preventing Regulator Freeze-up, 174
 Check for Understanding, 175
 Factors for Selecting Regulators, 176
 Inlet Pressure, Outlet Pressure, and Total Gas Demand, 177
 Overpressure Protection, 178
 Regulator Performance Curves, 179
 Designing the Second-Stage Regulator System, 180
 Factors in Determining the Number of Second-Stage Regulators, 181
 Learning Activity: Select The Number of Second-stage Regulators, 182
 Pressure Requirements, 183
 Checking Your Second-Stage Regulator Selection, 184
 Selecting First-Stage Regulators, 185
 Selecting 2-psi Regulators, 186
 Selecting Regulators: LP-Gas Code, 187
 Selecting Regulators: General Considerations, 188
 Check for Understanding, 189

LESSON 2: VAPOR METERS, 191

Introduction, 191
 Vapor Meter Operation, 192
 Propane Capacities of Vapor Meters, 193
 Pressure Factors, 194
 Sizing a Vapor Meter, 195
 Check for Understanding, 196
 Meter Indexes, 197
 Other Meter Accessories, 198
 Other Vapor Meter Issues, 199
 Module Summary, 200

MODULE 4 QUIZ, 201

MODULE 5: DESIGNING VAPOR DISTRIBUTION SYSTEMS: INTERIOR GAS PIPING, 203

Introduction, 203

LESSON 1: BTU LOAD AND REGULATOR REVIEW, 205

Introduction, 205
 Determine Total Demand, 206
 Diversity of Load, 207
 Learning Activity: Calculate Effective System Load, 208
 Purpose and Function of Regulators, 209
 Factors for Selecting Regulators, 210
 2-PSI System Regulator Requirements, 211
 Line Regulators, 212
 Sizing and Selecting Line Regulators, 213
 Requirements for Line Regulators, 214
 Use of Vent Limiters on Line Regulators, 215
 Venting Line Regulators, 216
 Venting Line Regulator Code Requirements, 217
 Outdoor Line Regulators, 218
 Learning Activity: Vent Limiters and Line Regulators, 219
 Check for Understanding, 220

LESSON 2: GAS PRESSURE IN INTERIOR PIPING SYSTEM, 221

Introduction, 221
 Volume and Pressure vs. Pipe Length, 222
 Volume and Pressure vs. Pipe Size, 223
 Check for Understanding, 224

LESSON 3: OTHER PIPING CONSIDERATIONS, 225

Introduction, 225
Piping Material, 226
Metallic Pipe and Tubing, 227
Plastic Pipe and Anodeless Riser, 228
Concealed Piping, 229
Connecting Material Restrictions, 230
Piping Below Foundations, 231
Alternative Piping Locations, 232
Piping Supports, 233
Other Design Requirements, 234
Sediment Traps and Shutoff Valves, 236
Check for Understanding, 237

LESSON 4: SIZING GAS PIPING, 239

Introduction, 239
Code Requirements, 240
Methods for Sizing Gas Pipes, 241
Longest Length Method, 242
Longest Length Method: Steps 1 - 7, 243
Calculation Worksheet: Longest Length Method, 244
Calculation Worksheet: Pipe Sizing
Longest Length Method, 245
Branch Length Method, 246
Branch Length Method: Steps 1 - 7, 248
Calculation Worksheet: Branch Length Method, 249
Hybrid Pressure Method, 250
Hybrid Method: 2 PSI Section, 252
Calculation Worksheet: Pipe Sizing,
Hybrid Length Method, 253
Hybrid Method: Low-Pressure Section, Steps 1- 3, 254
Calculation Worksheet: Pipe Sizing, Hybrid Method, 255
Writing the Piping Plan, 256
Check for Understanding, 257
Module Summary, 258

MODULE 5 QUIZ, 259

MODULE 6: INSTALLATION AND PRESSURE TESTING OF INTERIOR VAPOR DISTRIBUTION SYSTEMS, 263

Introduction, 263

LESSON 1: GENERAL INTERIOR PIPING INSTALLATION, 265

Introduction, 265
Exterior Piping, 266

Pipes and Fittings, 267
Step-by-Step: Connecting Copper Tubing by Brazing, 268
Piping Supports, 269
Concealed Piping, 270
Concealed Connections, 271
Gas Piping in Partitions, 272
Piping in Floors, 273
Branch Pipe Connection, 274
Gas Outlets, 275
Manual Gas Shutoff Valves, 276
Sediment Traps, 277
Appliance Connectors, 278
Installing Appliance Connectors, 279
Step-by-Step: Basic Piping Installation, 280
Determine Pipe Length, 281
Place and Join Piping, 282
Install Piping Supports, 283
Cap or Plug All Pipe and Tubing Outlets, 284
Perform a Pressure Test, 285
Check for Understanding, 286

LESSON 2: INSTALLING CSST, 287

Introduction, 287
Installation Considerations, 288
Training, 289
Electrical Bonding and Grounding, 290
Check for Understanding, 291

LESSON 3: PRESSURE TESTING, 293

Introduction, 293
Code Requirements for Pressure Testing, 294
Test Pressure, 295
Pressure Test Device, 296
Pressure Testing Gauges, 297
Step-by-Step: Procedural Steps for Pressure Testing, 298
Additional Requirements, 299
Pressure Testing Preparation, 300
Check for Understanding, 301
Module Summary, 302

MODULE 6 QUIZ, 303

MODULE 7: INSTALLING REGULATORS AND METERS, 307

Introduction, 307

LESSON 1: INSTALLING REGULATORS, 309

Introduction, 309
 Code Requirements, 310
 Code Requirements for Single- and 2-Stage Systems, 311
 Code Requirements for First-Stage and High-Pressure Regulators, 312
 Code Requirements: Installation, Location, and Remote Venting, 313
 Check for Understanding, 314
 Regulator Installation Accessories: Pigtail Connector, 315
 Regulator Installation Accessories: Vent Extension, 316
 Installing First-Stage Regulators, 317
 Installing Integral 2-Stage Regulators, 318
 Second-Stage Regulator Installation: A Closer Look, 319
 Installing Second-Stage Regulators, 320
 Installing 2 psi Service Regulator Systems, 322
 Inspecting and Protecting Regulators, 323
 Learning Activity: Installing Regulators, 324

LESSON 2: INSTALLING VAPOR METERS, 325

Introduction, 325
 Protecting Meters Against Physical Damage, 326
 Selecting Meter Location, 327
 Installing Meters at Propane Containers, 328
 Installing Meters at Service Entrances, 329
 Preparing and Mounting the Meter for Service, 330
 Check for Understanding, 331
 Installing the Meter, 332
 Interior Site Assessment, 334
 Recommended Installation Review, 335
 Module Summary, 337

MODULE 7 QUIZ, 339

MODULE 8: DESIGN CONSIDERATIONS FOR GAS APPLIANCES, 341

Introduction, 341

LESSON 1: TYPES OF APPLIANCES, 343

Introduction, 343
 Types of Appliances, 344
 Listed and Unlisted, 345
 Vented and Unvented, 346
 Direct Vent Appliances, 347
 Venting Requirements, 348
 Category I - IV Vented Appliances, 349
 Temperature and Condensation, 350

Temperature and Condensation: Category I, III, IV, 351
 Dedicated and Convertible Appliances, 352
 Residential and Commercial Appliances, 353
 Interior and Exterior Appliances, 354
 Restrictions on Appliances, 355
 Appliance Name Plate, 356
 Learning Activity: Reading a Name Plate, 357
 Check for Understanding, 358

LESSON 2: APPLIANCE LOCATIONS, 359

Introduction, 359
 Appliance Location Code Requirements, 360
 Additional Location Code Requirements, 361
 Clearance, 362
 Accessibility, 363
 Room Heaters, 364
 Check for Understanding, 365
 Attics, 366
 Commercial Businesses, 367
 Food Service Code Requirements, 368
 Prohibited Appliance Locations, 369
 Outdoor Appliance Locations, 370
 Venting and Piping, 371
 Check for Understanding, 372

LESSON 3: SELECTING APPLIANCES, 373

Introduction, 373
 Heat Loss, 374
 Appliance Input/Output Ratings, 375
 Inefficient Appliances, 376
 Sizing a Room Heater, 377
 Sizing a Central Heat Furnace or Boiler, 378
 Sizing a Water Heater, 379
 Manufacturer's Specifications, 380
 Customer Preference, 381
 Check for Understanding, 382

LESSON 4: CONVERTING GAS APPLIANCES, 383

Introduction, 383
 Check the Name Plate, 384
 Dedicated Appliances, 385
 Convertible Appliances, 386
 Conversion Factors, 387
 Heat Value and Density, 388
 Volume, 389
 Input Pressure and Primary Air Supply, 390
 High Altitude Combustion, 391
 High Altitude Operation, 392

High Altitude Adjustments, 393
Orifices and Gas Control Pressure Regulators, 394
Main Burner Orifices, 395
Universal Coaxial Orifices, 396
Orifice Drill Sizes, 397
Controls, 398
Verifying Manifold Pressure, 399
Verifying Manifold Pressure, 400
Documentation and Code Requirements, 401
Check for Understanding, 402
Module Summary, 403

MODULE 8 QUIZ, 405

MODULE 9: DESIGNING APPLIANCE COMBUSTION, DILLUTION, AND VENTILLATION AIR REQUIREMENTS, 409

Introduction, 409

LESSON 1: CALCULATING AIR FOR GAS APPLIANCES USING THE STANDARD METHOD, 411

Introduction, 411
General Requirements, 412
General Requirements: What's Not Included and Why, 413
Different Methods for Calculating Air, 414
Standard Method, 415
Standard Method: Steps 1 - 4, 416
Alternative Standard Method:
Steps 1 - 3, 417
Calculation Worksheet: Combustion Air, Standard Method, 418
Calculation Worksheet: Combustion Air, Alternate Method, 419
Check for Understanding, 420

LESSON 2: CALCULATING AIR FOR GAS APPLIANCES USING KAIR METHOD, 421

Introduction, 421
KAIR Method, 422
Calculation for Determining Combustion Air, 423
Step 1: Find Total Input Ratings of All Non-Fan-Assisted Appliances, 424
Step 2: Enter Air Infiltration Rate, 425
Step 3: Calculate Required Volume of Non-Fan-Assisted Appliances, 426
Step 4: Find Total Input Ratings of All Fan-Assisted Appliances, 427

Step 5: Calculate Required Volume of Fan-Assisted Appliances, 428
Step 6: Determine Total Required Volume for All Appliances, 429
Step 7: Determine Available Room Air, 429
Step 8: Determine if Extra Air Openings Are Required, 430
Learning Activity: Kair Method, Combustion Air, 431
Check for Understanding, 432

LESSON 3: HOW TO SUPPLY ADDITIONAL COMBUSTION AIR, 433

Introduction, 433
Different Methods For Supplying Air, 434
Two-Openings Method, 435
Direct Opening, 436
Wall Duct Air Supply, 437
Attic or Crawl Space Outdoor Air Supply, 438
Calculating Sizes for Two Permanent Openings, 439
Calculating Sizes for Two Permanent Openings: Step 1, 440
Calculating Sizes for Two Permanent Openings: Steps 2 & 3, 441
Reduced Building Area Openings, 442
Calculation Worksheet: Reduced Building Area Openings, 443
Single-High Opening Method, 444
Calculating Sizes for One Opening, 445
Calculating the Area of Louvered Openings, 447
Calculating the Area of Louvered Openings: Net Free, 448
Calculating the Area of Louvered Openings: Net-Free/No-Spec Sheet, 449
Outdoor Air vs. Combination Indoor/Outdoor Air, 450
Requirements for Combination Outdoor Openings, 451
Mechanical Air Systems, 453
Mechanical Combustion Air Supply, 454
Engineered Combustion Air Supply, 455
Effect of Direct Vent Appliances on Calculating Air, 455
Learning Activity: Sizing an Opening, 456
Module Summary, 457

MODULE 9 QUIZ, 459

MODULE 10: DESIGN OF GAS APPLIANCE VENTING SYSTEMS, 463

Introduction, 463

LESSON 1: TYPES OF VENTING SYSTEMS, 465

Introduction, 465
Importance of Venting, 466

Designing Appliance Venting Systems, 467
 Types of Venting Systems, 468
 Natural Draft Venting Systems, 469
 Masonry Chimneys and Gas Vents, 470
 Natural Draft Venting Termination, 471
 Gas Vent Code Requirements, 472
 Direct Venting Systems, 473
 Direct Venting Termination, 474
 Mechanical Draft Venting Systems, 475
 Vent Pressure, 476
 Mechanical Draft Venting System Terminations, 477
 How Venting Systems Affect Appliance Selection, 478
 Check for Understanding, 479

LESSON 2: MATERIALS FOR NATURAL DRAFT SYSTEMS, 481

Introduction, 481
 Venting System Components, 482
 Types of Vent Materials, 483
 Type B-Venting, 484
 Type BW-Venting and Type L-Venting, 485
 Single-Wall Venting, 486
 Single Wall Venting: Code Requirements, 487
 Vent Caps, 488
 Vent Wyes and Tees, 489
 Firestops, 490
 Vent Supports, 491
 Masonry and Factory-Built Chimneys, 492
 Check for Understanding, 493

LESSON 3: SIZING NATURAL DRAFT SYSTEMS FOR A SINGLE APPLIANCE, 495

Introduction, 495
 Sizing Methods, 496
 Using Venting Tables, 497
 Draft Hood and Single-Wall Metal Pipes, 498
 Sizing Venting With Two Elbows or Less , 499
 Problem 1: Designing a Vent System for a Single Appliance, Draft-Hood Equipped, 500
 NFPA 54 Table 13.1 [A] - Type B Double-Wall Gas Vent, 501
 Problem 2:
 Designing a Vent System for a Single Appliance, Fan-Assisted, 502
 Problem 3: Designing a Vent System for a Single Appliance, Draft-Hood Equipped, 504
 Problem 4: Interpolating Between Table Values, 506
 Table 13.1 [A] - Type B Double-Wall Gas Vent, 507
 Problem 5: Designing a Vent System for a Single Appliance, Draft-Hood Equipped, 508

Table 13.1 [D] - Masonry Chimney, 509
 Table F.2.3 - Masonry Chimney Liner Dimensions with Circular Equivalents, 510
 Problem 6: Sizing for an Exterior Chimney, 512
 Table 13.1 [F] - Exterior Masonry Chimney, 513
 Winter Design Temperatures for the Contiguous United States, 514
 Sizing Single Appliance Venting Systems Using More Than Two Elbows, 515
 Single Category I Appliance Installation Using More Than Two Elbows, 516
 Table 13.1 [a] Type B Double-Wall Gas Vent, 517
 Obstructions and Vent Dampers, 518
 Two-Stage or Modulating Appliances, 519
 Sizing Vent Connectors, 520
 Maximum Lengths, 521
 Sizing Gas Vents, 522
 Vertical Vent Upsizing, 523
 Outdoor Exposures, 524
 Clay-Tile-Lined Exterior Masonry Chimneys, 525
 Learning Activity: Choosing Venting For An Existing B-Vent, 526
 Check for Understanding, 527

LESSON 4: DESIGNING NATURAL DRAFT VENTING SYSTEMS, 529

Introduction, 529
 Sizing New Multiple Category I Appliance Venting Systems, 530
 Vent Connector Length, 531
 Problem 1: Common Venting Two Appliances, Draft Hood Equipped, 532
 Table 13.2 [B] - Type B Double-Wall Vent, 533
 Problem 2: Common Venting Water Heater with Furnace, 534
 Table 13.2. [b] - Type B Double-Wall Vent, 535
 Problem 3: Interior Masonry Chimney with Two Appliances, 536
 Table 13.2 [d] Masonry Chimney, 538
 Vent Connector Manifold, 539
 Problem 4: Sizing a Vent Connector Manifold, 540
 Connecting Appliance Venting to Existing Venting Systems, 541
 Installation Questions, 542
 Multistory Venting Considerations, 543
 Multistory Vent Height, 544
 Multistory Lowest Vent and Vent Connector Sizing, 545
 Multistory Vent Offsets and Capacity, 546
 NFPA 54 Requirements, 547
 Minimize Lateral Runs, 548
 Provide Required Clearances , 549

Avoid Existing Ducts , 550
Other Considerations, 551
Learning Activity: Venting Multiple Appliances Into A Single Vent, 552
Check for Understanding, 553
Table 13.2 [B] - Type B Double-Wall Vent, 554

LESSON 5: MECHANICAL DRAFT VENTING SYSTEMS, 555

Introduction, 555
Mechanical Draft Systems , 556
Induced Draft, 557
Forced Draft, 558
Mechanical Vent System Advantages, 559
Electrical Interlock, 560
Direct Vent Systems, 561
Exhaust Systems, 562
Excessive Negative Pressure, 563
Gas Clothes Dryer, 564
High-Efficiency Appliance Systems, 565
Venting for High-Efficiency Appliances, 566
Layout and Selection, 567
Condensation Drain, 568
Check for Understanding, 569
Module Summary, 570

MODULE 10 QUIZ, 571

MODULE 11: INSTALLING GAS APPLIANCE VENTING SYSTEMS, 575

Introduction, 575

LESSON 1: INSTALLING NATURAL DRAFT VENTING SYSTEMS, 577

Introduction, 577
Installing Venting Components, 578
Draft Hood, 579
Draft Hood Location, 580
Vent Connectors, 581
Installing Vent Connectors, 582
Vent Connector Thickness, 583
Vent Connectors, 584
Maintaining Proper Clearances, 585
Joint Connections, 586
Vent Wyes, Tees, and Firestops, 587
Vent Supports and Roof Flashing, 588
Vent Caps, 589
Termination Requirements: Chimneys, 590

Termination Requirements: Gas Vents, 591
Connecting to a Common Vent, 592
Connecting Oil and Gas Appliances to a Common Vent, 593
Installing a Metal Chimney Liner, 594
Venting in Colder Climates, 595
Multistory Venting, 596
Check for Understanding, 597

LESSON 2: INSTALLING MECHANICAL AND DIRECT VENTING SYSTEMS, 599

Introduction, 599
Installation Guidelines for Mechanical Draft Venting Systems, 600
Mechanical Draft Systems, 601
Mechanical Draft Systems: Considerations, 602
Installing a Mechanical Draft System, 603
Mechanical Vent Systems: Sidewall Vented, 604
Step-by-Step: Mechanical Vent Systems: Installing PVC Pipe, 605
Mechanical Power Vent Systems Added to Category I Appliances, 606
Step-by-Step: Process of Adding Mechanical Power Vent Systems, 607
Mechanical Draft Venting Termination, 609
Direct Vent Systems Installation Guidelines, 610
Direct Vent Appliances: Guidelines, 611
Venting System Component with a Direct Vent Appliance, 612
Proper Operation of an Appliance, 613
Check the Siding, 614
Step-by-Step: Installing a Direct Vent system, 615
Direct Venting Termination, 616
Installing an Exhaust Hood, 617
Exhaust Venting System, 618
Check for Understanding, 619
Module Summary, 620

MODULE 11 QUIZ, 621

MODULE 12: CONDUCTING A LEAK CHECK, 625

Introduction, 625

LESSON 1: LEAK CHECK PROCEDURES, 627

Introduction, 627
Leak Check, 628
Performing a Leak Check, 629
Appliances With 100% Safety Shutoff Valves , 630

Appliances Without 100% Safety Shutoff Valves , 631
 Leak Check Instruments, 632
 Leak Check Methods, 633
 Using a Manometer, 634
 Performing a Leak Check Using a Manometer, 635
 Using a Test-Block Gauge, 638
 Performing a Leak Check Using a Test-Block Gauge, 639
 Using a High-Pressure Gauge, 641
 Performing a Leak Check Using a High-Pressure Gauge, 642
 Using a Vapor Meter , 644
 Performing a Leak Check Using a Vapor Meter, 645
 Check for Understanding, 647
 If You Discover a Leak, 648
 Isolated Testing of Piping for Leaks, 649
 Integral 2-Stage Regulator Testing , 651
 Learning Activity: Leak Checking with a Block Gauge Decision Tree, 652
 Module Summary, 653

MODULE 12 QUIZ, 655

MODULE 13: PURGING AIR FROM A GAS PIPING SYSTEM, 657

Introduction, 657

LESSON 1: PURGING AIR FROM A PIPING SYSTEM, 659

Introduction, 659
 Purging, 660
 Safety Precautions, 661
 Piping System Layout, 662
 Preliminary Purging Steps, 663
 Purging Outdoor Piping, 664
 Steps for Purging First-Stage Lines and Lines to Outdoor Appliances, 665
 Purging Indoor Piping, 666
 Releasing Purged Propane, 667
 Controlled Purging Burner Method, 668
 Appliance Burner Method, 671
 Steps for Purging Using an Appliance Burner, 672
 Remote Purge Line, 674
 Learning Activity: Purging Air Decision Tree, 678
 Check for Understanding: Purging, 679
 Module Summary, 680

MODULE 13 QUIZ, 681

MODULE 14: APPLIANCE STARTUP AND TEST REQUIREMENTS, 683

Introduction, 683

LESSON 1: APPLIANCE STARTUP, 685

Introduction, 685
 Requirements for Placing Appliances into Initial Operation, 686
 Code Requirements, 687
 Lighting Appliance Pilots, 688
 Steps for Lighting a Standing Pilot, 689
 Steps for Lighting Pilots Without Pilot Safety Devices, 692
 Steps for Starting Up Electronic Control Ignition Systems, 693
 Check for Understanding, 695

LESSON 2: SYSTEM FLOW AND LOCKUP TESTS, 697

Introduction, 697
 Purpose of Tests, 698
 Flow and Lock-Up, 699
 Regulators, 700
 Flow Test Using a Manometer, 701
 Flow Test Procedure, 702
 Flow Test at Second-Stage or Line Regulator, 703
 Flow Test at 2-PSI or First-Stage Regulator, 704
 Lock-Up Test for Second or Integral 2-Stage Regulator, 705
 Lock-Up Test for First-Stage or 2-PSI Regulator, 708
 Learning Activity: System Flow and Lock-up Test Decision Tree, 709
 Check for Understanding, 710
 Check for Understanding, 711

LESSON 3: SPILLAGE TEST, 713

Introduction, 713
 Spillage Test Procedure, 714
 Check for Understanding, 716

LESSON 4: APPLIANCE CONTROLS, 717

Introduction, 717
 Placing Appliances into Initial Operation, 718
 Appliance Controls, 719
 Gas Controls, 720
 Mechanical Gas Controls , 721
 Pressure-Regulated Gas Control Valve, 722
 Shutting Main Burner Off , 723
 Thermostats, 724
 Ignition Controls and Devices, 725
 Thermocouples , 726

CONTENTS

Pilot Generators, 727
Electronic Control Ignition Systems, 728
Flame Rectification, 729
Check for Understanding , 730

LESSON 5: SAFETY DEVICES, 731

Introduction, 731
Safety Devices, 732
Types of Safety Devices, 733
Oxygen Depletion Sensors, 734
Electronic Control Ignition System Flame Sensors, 735
Flame Roll Out and Energy Cut-off Devices, 736
High-Limit Switches, 737
Additional Safety Devices, 738
Water Heaters, 739
Low Water Cut-Off Devices, 740
Fan Control Switches, 741
Learning Activity: Identify Appliance Components, 742
Check for Understanding , 743
Module Summary, 745

MODULE 14 QUIZ, 747

MODULE 15: IDENTIFYING BURNING CHARACTERISTICS OF PROPANE, 751

Introduction, 751

LESSON 1: IDENTIFYING BURNING CHARACTERISTICS OF PROPANE, 753

Introduction, 753
Combustion Requirements, 754
Flame Cones, 755
Appliance Ignition Sources, 756
Air Sources for Combustion, 757
Proper Burner Operation, 758
Inadequate Air Supply, 759
Excessive Air Supply, 760
Check for Understanding, 761

LESSON 2: BASIC BURNER FLAME ABNORMALITIES, 763

Introduction, 763
Flame Problems, 764
Flashback, 765
Problems from Flashback, 766
Extinction Pop, 767
Yellow Flame, 768

Problems from Yellow Flame, 769
Fluctuating Flame, 770
Check for Understanding, 771
Unstable or Wavering Flame, 772
Flame Lifting, 773
Floating Flame, 774
Flame Roll Out, 775
Direct Vent Appliances, 776
Check for Understanding, 777
Recognizing and Correcting Other
Burner Abnormalities, 778
Learning Activity: Identify Flame Abnormalities, 779
Module Summary, 780

MODULE 15 QUIZ, 781

CHECK YOUR WORK, 783

**ANSWER KEY:
CHECK YOUR UNDERSTANDING, 783**

**ANSWER KEY:
END-OF-MODULE QUIZZES, 793**

GLOSSARY, 797
